

Prospérité, premium milk for baristas thanks to a unique sustainable milk collection!

Prospérité UHT milk has the best **organoleptic properties** that are needed for the preparation of barista coffee drinks. **Prospérité's premium full cream milk is ideal for perfectly stable, creamy and silky milk foams** with a **unique texture**, to get perfect lattes, cappuccinos, and mocaccinos and boost their milky taste!

Since 2017, the premium milk from grass-fed cows' collection was launched to offer the most virtuous milk for all:

While taking care of cows

- 170 days per year spent on pasture,
- 1500 square meters of grazing land per cow,
- Breeding on quality straw during the winter period for healthier cattle.

With only sustainable French milk

- Milk collection near the dairy plant of Saint-Pol-sur-Ternoise in the Hauts-de-France region only,
- Preservation of the grassland landscapes of the Hauts-de-France,
- Enhancement of the protein autonomy of farms thanks to the GMO-free grass feeding.

Using 100% recyclable bottle

- Blown HDPE bottles entirely manufactured on the spot,
- Easy to recycle paper label, HDPE cap and aluminum lid,
- Bottle designed for perfect milk preservation.
